

# How to defend your garbage from crows.

Crows have been picking and scattering a lot of garbage recently.  
To prevent this,

## <As for food scraps>

- ① Please drain the water of wet food scraps,  
put them with wrapped dry trash in center of garbage bag,  
and tie each garbage bag tightly.
- ② Put the net over the whole trash against hungry crows.

## <As for clean / dirty plastics>

Please separate clean and recyclable plastics from dirty plastics.

- ① Rinse the plastics. (plastic cups, packages, and trays)
- ② clean plastics       Plastic resources  
dirty plastics       Burnable trash

Thank you for your keeping the trash site clean.
